ProX XS-CDiBL Flight Case for Medium Format CD-Media Player | Black on Black

Description

The **ProX XS-CDiBL** Case was created for the protection and longevity of medium Format CD/Media Players. A durable case, the XS-CDi is designed with the DJ's needs in mind, featuring a removable front panel for easy access to your front controls and cd input/eject, a rear access cable port for no hassle connections. Built with top grade heavy-duty materials, the XS-CDi gives you maximum durability, dependability, and security.

This medium-format cd player case is constructed with our ATA style 300 GigReady Signature Series laminated 3/8" re-enforced plywood for complete protection of your investment. Our cases are standard with steel, heavy-duty ball corners to withstand the rigorous travel that pro-DJ demands. Silver on Black construction and modern design will turn heads and keep with the decor of any venue.

The XS-CDiBL has all the features you are looking for in a high-grade CD Player Case. You will definitely be satisfied with this top of the line product from the signature series line of products from ProX Cases!

This ProX ATA 300 Style Road/Flight case is manufactured with the Honeycomb Digital™ laminated surface Design. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!
