### ProX XT-WAVE656 6.56ft - 2.0m F31 Wave Single Pipe 6.56ft - 2.0m 4 Pack | Plates/Covers Not Included

#### Description

The **ProX XT-WAVE656** Wave single-tube system can make for very unique shapes for totems by adding base plates and top plates along with spandex covers. (sold separately) They can also be incorporated into trussing systems (non-load bearing) for creating

along with spandex covers (sold separately). They can also be incorporated into trussing systems (from load bearing) for creating interesting accents.

ProX Truss specializes in high-quality, general-purpose aluminum lighting and stage trussing designed for live stages, theaters, nightclubs, church installations, mobile applications, trade shows, and retail applications. Our products are built using 6082-T6 Aluminum Alloy compositions. This lightweight, corrosion-resistant aluminum has a very high tensile strength, giving you the support and stability you need. The ProX Truss Conical Coupling System allows for genderless trusses, providing a more precise line up of chords and fastening points, while the conical shape of the couplers helps maintain overall rigidity at the stress points and makes parts harder to damage. This system also makes assembly quick and easy with very few tools needed to complete set up.

**Covers, Top Plate and Base Plates are shown for illustration only and are not included in the package. Purchase the plates and covers appropriate for your needs separately.**

Pack of 4x 6.56ft 2M waved single pipes only.
