ProX XS-8R18 8U Space Amp Rack Mount ATA Flight Case 18 Inch Depth | Shipped Disassembled

Description

The **ProX XS-8R18 8 Unit** vertical amplifier rack case is the perfect storage solution for convenient security for a wide variety of amplifiers, pro DJ mixers, effects and any other standard 19" rack-mountable pro audio/DJ/Network gear with an 18" Rail-to-Rail depth. Each rack unit is 1.75" so $8 \times 1.75" = 14"$ Height inside the case. Built with a heavy-duty construction design and dual mounting rails your equipment won't dislodge or slip, and strain on the rack ears will be minimized. The XS-8R18 case is assembled with thicker 3/8" plywood for premium protection. In addition to the heavy-duty design and convenient features of the XS-8R18, this case gives you a stylish, durable, and dependable product that will last a lifetime. These professional-grade products also include external spring-loaded handles and butterfly twist latches and padlock ready for added security. The durable, professional-grade handles, 2 on each side, make for easy lifting when fully loaded. In addition to the heavy-duty design and convenient features of the XS-8R18, this case is a stylish, durable, and dependable product that will last a lifetime. 3" Front/Rear Door Depth.

This **ProX ATA 300 Style Flight Case** is manufactured with the **Honeycomb Digital™** laminated surface design on 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

This **ProX XS-8R18** is an easy to assemble 8 Space vertical amplifier rack case. It is shipped partially assembled in a flat package in order to lower costs to our customers. With just hand tools you can assemble this case quickly and easily following the included instructions. Everything is included!

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!
