ProX X-BTRI3W12 IP Chameleon 12 LED Outdoor Bar

Description

The Chameleon Line of Outdoor LED Lighting Fixtures are sets of robust color-washing fixtures with Tri (3in1) LEDs that create dynamic, full RGB color mixes, producing up to 16 million colors and projecting light up to 75 feet.

This advanced 3-color innovation gives users tremendous advantages over single-color LEDs, including improved RGB color mixing, the elimination of multi-color shadows, and a much brighter, more even field. High power LEDs are rated for up to 100,000 hours and require no maintenance, saving energy and labor costs.

Rated IP66 for outdoor use, the durable housings are well sealed, manage heat dissipation efficiently, thereby keeping the LEDs cooler. The fixtures meet the needs of lighting designers, architects and performance artists by offering an exciting new array of effect lighting possibilities, both interior and exterior.
