ProX XS-CDM19WLT Flight Case Universal DJ Coffin for 19" Mixer and 2 Large Format CD Players W-Laptop Shelf and Wheels

Description

The **ProX XS-CDM19WLT** Road Case is designed by ProX Cases for any 19" mixer or other rack unit (FX, etc) up to 4U and two standard tabletop CD players. With its 2 removable doors, you can easily load CDs and replace the doors after the set for true mobile security! It is made with the highest quality material and workmanship to give you the ultimate security for your equipment. If you have a passion for your gear and want to keep it safe at all times, this case will always perform at the highest level.

The XS-CDM19WLT is constructed with our rugged signature 3/8" Gig-Ready Series Plywood, reinforced steel ball corners for protection and easy stacking, and padded steel handles and latches which are recessed to protect them from damage during transport. There is additional space for cables and small accessories in the back and underneath the unit for convenience, as well as a removable front panel for you to easily access the front controls and headphone/mic jacks.

This ProX ATA 300 Style Road/Flight case is manufactured with the **Honeycomb Digital™** laminated surface Design. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!

For your safety, and the safety of your equipment, do not attempt to transport or move with any gear stored on a sliding shelf or side shelf and be aware that the sliding shelf can be removed when slid out to its furthest point.
