### ProX X-MXTSBLT Flight Case for Pioneer DDJ-SB DDJ-SB2 and Numark Mixtrack Pro II Digital Controller W-Sliding Laptop Shelf

#### Description

The **ProX X-MXTSBLT** Road Case is designed by ProX Cases for the Pioneer DDJ-SB DDJ-SB2 and Numark Mixtrack Pro2 and is made with the highest quality material and workmanship to give you the ultimate security for your controller. If you have a passion for your gear and want to keep it safe at all times, this case will perform at the highest level every time.

The X-MXTSBLT is constructed with our rugged signature 3/8" Gig-Ready Series Plywood, reinforced steel ball corners, as well as recessed steel padded handles and latches. There is additional space for cables and small accessories in the back and underneath the unit for convenience, as well as a removable front panel for you to easily access the front controls and headphone/mic jacks.

It's all about the options! This item is part of our Silver on Black series, which features a black finish with silver hardware for a sleek, professional look. There's no going back. This stunning road case for your professional gear will always make a statement.

This ProX case is manufactured with the Honeycomb laminated surface design. Made with the super-sleek look of Honeycomb hexagon grids on all laminated outer shell surfaces, which gives the cases an almost alien look! Also as opposed to regular smooth laminated plywood cases from other manufacturers, the ProX Honeycomb design helps prevent minor to mild scratches. The Honeycomb Digital line design was inspired by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases during the manufacturing process use CNC technology to assure all cases are consistently built with strict specifications that are required for the high-quality standards that ProX cases is known for since 1984.

For your safety and the safety of your equipment, do not attempt to transport or move with any gear stored on a sliding shelf or side shelf and be aware that the sliding shelf can be removed when slid out to its furthest point.

#### Features

**ProX has been manufacturing flight cases since 1984 and are designed to protect your investment**

- Silver on Black Digital Honeycomb exterior design
- Sliding Laptop Shelf
- ATA-300 Style Gig Ready Flight Road Case
- Signature Series Certified Laminated Gig ready 3/8" plywood
- High-density foam interior support & casing

## Customer Testimonials

This is my first case for my first DJ controller. I have been DJing for over 30 years now, and have gone through just about every transition, equipment-wise, you can imagine.

I went all digital about a decade ago, and never looked back. Been wanting a new controller for a couple of reasons, mostly because my old software no longer was supported on my new Mac. So I figured I'd bite the bullet and go all in.

I did finally purchase the Pioneer DDJ-SB2 (not from Amazon) and it has been an amazing first controller, so much, that I can't imagine why I'd upgrade. As a mobile DJ, it does everything I need, and more. So of course, I needed a case. Enter this one.

It feels heavy, in a good way. Nice and solid. But at only 25 pounds, its not TOO heavy. It fits the DDJ-SB2 perfectly! It comes with velcro-removable foam pads that you can rearrange to your liking, leaving plenty of room for side connections (headphone/microphone on the left for my controller). But with the controllers its designed for in that range, you can move it for your needs.

Its also the first sliding shelf case I've ever owned. I was a little leery about placing my MacBook Pro up there, but it balances nicely, and never feels like it will tip forward. After having one of the laptop stands attached to my previous case, it does take a bit getting used to having it so far away. Then again, I'm old. LOL

Overall, I'd say if you plan on taking your controller anywhere besides your bedroom, you need a case. This one gives me the quality and heft I was looking for, a professional design, at a great price. I already had \$90 in Amazon Gift cards, but I would pay full price in a heartbeat.

It is hands down, the nicest case that I have ever owned. I am hoping that it will push me to keep DJing for years to come!
