ProX XS-DJM2000 Flight Case for Pioneer DJM 2000 DJ Mixer

Description

The **ProX XS-DJM2000** case allows you to safely house your Pioneer DJM 2000 mixer and is made with the highest quality material and workmanship to give you the ultimate security for your controller. If you have a passion for your gear and want to keep it safe at all times, this case will perform at the highest level every time. The XS-DJM2000 is constructed with our rugged signature 3/8" Gig-Ready Series Plywood, durable rubber wheels, reinforced steel ball corners, as well as recessed steel padded handles and latches. There is additional space for cables and small accessories in the back.

This **ProX ATA 300 Style Flight Case** is manufactured with the **Honeycomb Digital™** laminated surface design on 3/8" plywood. Made with the super-sleek look of Honeycomb Digital™ hexagon grids on all shell surfaces, which gives the cases an almost alien look! Also as opposed to regular laminated plywood cases from other manufacturers, the ProX Honeycomb Digital™ design helps prevent minor to mild scratches. The Honeycomb Digital™ line design was inspired in 2009 by the design of New York City Street Manhole covers which are made to handle rough and tough everyday punishment.

All ProX cases use CNC technology, during the manufacturing process, to assure that cases are consistently built with strict specifications and tolerances that are required for the high-quality standards that ProX cases have been known for since 1984.

Note: Any pictured device is shown for reference only and not included!

Interior Dimensions: 17" x 16.2" x 4.4"
