ProX XT-GSBOUTSX4PKG Ground Support & Leg Stabilizer Package Includes Rolling Base 4x Outrigger Leg Braces

Description

ProX XT-GSBOUTSX4PKG Ground Support & Leg Stabilizer Package **Includes Rolling Base 4x Outrigger Leg Braces** This package is specifically designed to accommodate F34, F44, and 12" Bolt truss systems. Ideal for DJs, exhibitions, and other lightweight applications, this ground support base offers exceptional stability and mobility. Equipped with four leveling screws and heavy-duty caster wheels, it enables easy movement and precise positioning. Please note that the **XT-GSBMK3** is recommended for light-duty usage only, without outriggers and lifting capability, making it a reliable choice for DJs, expos, and other similar light-duty applications.

To ensure a firm and steady installation, we introduce the ProX Truss **XT-GSOUTS3**. This single 36" outrigger serves as an essential component, featuring an adjustable foot and an aluminum assist brace tube outrigger base strut. The brace legs securely attach to both the base and the Tower Truss, providing enhanced stability and structural integrity. With this outrigger in place, you can confidently create a solid foundation for your event trussing system, ensuring a safe and professional setup.

Combining the two offers you the ultimate solution for your event needs. Achieve seamless mobility, precise positioning, and reliable stability with the XT-GSBMK3 ground support base, while the outrigger brace legs guarantee a secure and steady installation. Whether you're a DJ, Tradeshow, or engaging in other lightweight applications, this dynamic duo provides the professional support you require.

This package ships in 3 separate boxes
