ProX T-C2A Light Duty Aluminum C Style M10 Clamp with Flat Thumbscrew for 2" Truss Tube Capacity 45 lbs Black Finish

Description

ProX **T-C2A** Light Duty Aluminum **C-Clamp with Flat Thumbscrew** for 2" Truss Tube **Capacity 45 lbs**. This Light Duty Mounting C-Clamp is a versatile and reliable piece of equipment designed specifically for use in DJ lighting applications, as well as stage, theatrical, concert, and event lighting. This clamp is ideal for many hanging applications, providing a secure and locked-in feel to ensure that your equipment remains in place during performances.

One of the key features of the T-C2A Light Duty Mounting C-Clamp is its ability to tighten down securely onto a range of truss diameters, from 1.5 inches to 2 inches. This versatility makes it an excellent choice for a wide variety of hanging options.

This clamp is specifically designed for use with non-moving fixtures such as **Pin spots, Par Cans, LED Pars, Wireless DMX Receivers, Dimmer Packs**, and other small lighting equipment. It is important to note that this clamp is not suitable for use with moving fixtures.

Compared to an O-Clamp, which may only properly hold a fixture that is hanging directly under a truss or hanging sideways off a vertical truss, the C-Clamp is designed to hold fixtures at a desired angle. This makes it a more versatile and useful option for a wider range of lighting setups.

This product is equipped with an M10 threaded bolt attachment
