ProX T-C3 Plastic O Style Clamp for 2" (50mm) and 1.5" (38mm) Truss Tube Capacity 28 Lbs.

Description

ProX T-C3 Plastic O-Style Clamp for 2" (50mm) and 1.5" (38mm) Truss Tube **Capacity 28 Lbs.** This is a light-duty clamp that is meant for the purpose of light-duty DJ lighting, including par cans and similar-style LED lighting. A plastic O-clamp is a versatile and lightweight clamping solution designed to securely fasten lighting and audio equipment to truss systems, pipes, and tubing. Typically made from high-strength ABS plastic, these clamps are durable and offer long-lasting performance. The O-shaped design of the clamp ensures a tight grip on the truss or pipe, providing a stable and safe mounting point for your equipment.

Many plastic O-clamps are adjustable, allowing you to customize the tension of the clamp to ensure a secure fit. The O-clamp design allows for quick and easy mounting onto the truss, and it can be securely fastened in place using a bolt and wing nut. The clamp's wide surface area helps to distribute weight evenly, reducing the risk of damage to the truss or equipment while being hung. Additionally, it features a **removable center ring, which converts the plastic clamp to a 1.5-inch (38mm) clamp**, suitable for most triangle trussing.

Features

- **For 2" (50mm) Pipe and 1.5" (38mm) Triange Truss**
- **Durable ABS Plastic**
- **Secure Fastening**
- **Adjustable Tension**
- **Lightweight and Easy to handle**
- **Long Lasting Durable Construction**
- **Designed to fit a wide range of truss**
- **Ideal for audio & lighting equipment**
- **Tight and secure grip "O-Shaped" design**
- **Not suggested for heavy loads or lighting**
- **Includes Connecting Hardware**
- **Max Capacity of 28 lbs.**
