ProX XT-PICKPRO800 Professional Hanging Truss Pick with Suspension Mounting System for F34 F32 F31 12" Box Truss - SWL 800 lbs

Description

ProX XT-PICKPRO800 Professional Hanging Truss Pick with Suspension Mounting System for F34 F32 F31 12" Box Truss - SWL 800 lbs. Regarding installations or semi-permanent setups demanding precise truss rigging, the ProX X-PICKPRO800 is your ultimate choice. Crafted from machined and welded tubular box material, this truss pick excels in both lightweight design and unparalleled strength, making it the ideal companion for flying truss systems with the center of gravity precisely at the truss center.

Designed to be **compatible with all F34/F32/F31/12" Bolt Truss systems** from ProX and other similar-sized truss manufacturers, the PickPro800 seamlessly integrates into your setup. Safety and simplicity are the cornerstones of the XT-PICKPRO800. It offers a secure and straightforward method for raising, lowering, or hanging LED screens from trussing, especially when using truss base plates. With an impressive single-pick load capacity of 800 lbs, you can effortlessly distribute the entire trussing weight with multiple picks, ensuring a smooth and secure assembly or teardown process.

Constructed from sturdy box aluminum, the X-PICKPRO800 comes with (attached) Pro Clamps and a generously sized eye hook for lifting, making it a reliable companion for your rigging needs. For optimal results, the X-PICKPRO800 is best used in pairs or multiples. Rigging heavy truss sections with a single pickup point is risky and strongly discouraged. Elevate your truss rigging game and prioritize safety with the ProX XT-PICKPRO800.

Features

- **Versatile Mounting:** Easily mounts anywhere along the truss length.
