### ProX T-LS31M Set of (2) 10 Ft. DJ Stage Lighting Truss Stands System Includes (2) T-Adapters and (2) I-Beam Segments

#### Description

ProX T-LS31M Set of (2) 10 Ft. DJ Stage Lighting Truss Stands System Includes (2) T-Adapters and (2) I-Beam Segments. ProX T-LS31M lighting stands offer a rugged yet portable lighting solution, perfect for traveling DJs, artists, performers, nightclubs, or stage shows. These stands are meticulously designed with top-tier safety and performance as priorities. Crafted from durable metal components, they surpass other lighting stands in longevity.

This trussing system ensures easy setup and remarkable stability for your professional equipment. Additionally, it serves as a mounting system for large-format projector screens. The package includes two telescoping tripods that extend to 12.5 feet, complete with two locking grooved pins. Furthermore, two T-bars with four mounting points each and two five-foot trusses are provided, allowing you to create a ten-foot-wide span or use them individually.

#### Safety Instructions

To prevent issues, a qualified individual should inspect all rigging hardware, stands, and equipment before each use, conducting regular major inspections for wear, abuse, and general suitability. Adhere to all warnings and usage instructions provided in the comprehensive manual.

#### Basic Usage

Position the stand on a stable, hard surface, away from overhead obstacles.  
Stabilize the legs before elevating the tower or any load.  
When outdoors, secure the tower with braces or cables in windy conditions.

#### Safety Notes

Load truss and stands within their rated weight capacity.  
Lock all safety mechanisms (safety pins, knobs).  
Ensure loads are centered and balanced on each lifting unit.  
Attach safety cables or chains to all items connected to the unit.  
Maintain a safety perimeter with a radius 5 feet greater than the maximum stand height during lifting and lowering.  
During transport, close all sections and tighten tube clamps.  
Do not attempt to move the stand when it is loaded or in an extended position.

#### Service Notes

Only qualified personnel should perform servicing and repairs.  
Inspect telescopic masts before each use, replacing damaged parts immediately.
